Subject Index

Abnormal nuclear matter 133, 136
Adler consistency condition 73
Adler-Dothan theorem 94, 113, 115
Adler-Weissberger relation 89
Auger-conversion 249
Axial vector current 26, 29, 68, 88, 114, 115, 120, 121, 174, 183, 187, 248, 265, 271, 273
  quenching (see Quenching of g_A)

Beta-decay exchange effects 25, 29, 41, 60
  A = 3 system 6, 31, 124, 126
  closed shell ± one nucleon 41, 57, 58
  heavier nuclei 33, 57
  nuclear matter 35
  surface effects 37
  configuration mixing effects 41
  core-polarisation effect 41, 47, 54, 124
  second order configuration mixing 58
  V-A versus S-T 250, 254

Catastrophic term 107
Centre-of-mass correlations 200
Charge form factor
  exchange correction 21
  of ^{3}He 165
Chew-Low theory 85, 122, 150, 231
Chiral symmetry 105, 113, 133
Clausius Mosotti law 77
Cluster effects 200
Cohen-Kurath wavefunctions 264, 268, 270
Commutator term 107
Configuration mixing in beta-decay 41
Conserved vector current (CVC) 25, 113, 247, 256
Core-polarisation effect
  in beta-decay 41, 47, 54, 124
  in electric quadrupole moments 49
  in the E2 effective charge 54
Correlations
  short-range 77, 84, 85
  Pauli 81, 200
  centre-of-mass 200
Crossed-pion processes 166

Deuteron
  photodisintegration 161
  electrodisintegration 11, 23, 105, 163,
  isobar components 21, 143, 151, 153, 156, 162
  pion scattering 226, 233, 234
  break up with protons 227
  proton scattering 227, 233
  charge exchange 228
  muon capture 263
  electron scattering 11, 23
Dispersion relation techniques 19, 99
Double charge exchange (see Pion double charge exchange)
Double counting 7, 72, 143, 153, 154, 253

Effective one-body operators 54
Eikonal approximation 198
Electrodisintegration of
  deuteron 11, 23, 105, 163
  A = 3 11, 23
Electromagnetic multipoles
  configuration mixing effect 47
  exchange contribution 9, 11, 23, 105, 108

Electron scattering by
deuteron 11, 23
A = 3 system 11, 23
heavier nuclei 274
Electron-muon universality 250, 254
Exchange effects
in the A = 2 system 23, 141, 162, 163
in the A = 3 system 23, 163, 165
in nuclei 5, 23, 105, 274
in electromagnetic multipoles
electric 9, 50, 162, 163, 165, 270
magnetic 11, 50, 162, 163, 270
in beta-decay 25, 29, 50, 60, 88, 124, 270
in hadron-nucleus scattering 225
non-Born contribution 17, 29
of $\Delta(1236)$ 18, 29, 63, 72, 109, 114, 115, 121, 124, 134, 141, 162, 163, 165, 169, 232, 242
of N*(1400) 19
of N*(1525) 19
of N*(1688) 146, 165, 231
of ρ-meson 19, 29, 86, 115, 117, 125, 146
of ω-meson 19, 29, 111, 117

Fermi gas model (see Nuclear matter, effect of quenching g_A)
Fraunhofer diffraction 198
Fresnel diffraction 198
Frozen target 198
Fujii-Primakoff approximation 264

g_A (see Axial vector current)
g_P (see Pseudoscalar current)
G-parity 51, 111, 235
Gamow-Teller matrix elements 41, 60, 121, 123, 125, 126, 264
Gauge invariance 14
Gauge theories 111, 113, 258, 278
Glauber theory 193, 198, 215, 226, 234
Goldberger-Treiman relation 27, 29, 85 89, 94, 121, 188, 192, 249, 257
Goldstone mode 136

Hadron scattering 193, 215, 225
Hadronic atoms, line shape 175
Harmonic oscillator model 203
High p_T 193, 215, 221

Isobar configurations 116, 141, 151, 244
in the A = 2 system (see Deuteron, isobar components)
in the A = 3 system 152, 163, 164
in hadron-nucleus scattering 227, 232
in pion double charge exchange 242
as 3-body forces 144
transition potentials 116, 144, 145
Isobar $\Delta(1236)$ contributions (see Exchange effects, non-Born contribution of $\Delta(1236)$
Isotensor coupling in beta-decay 262

Konopinski-Mahmoud scheme 262
Kroll-Ruderman theorem 16, 107, 267

Landau-Migdal theory 117, 118, 120
Lee-Wick abnormal matter (see Abnormal nuclear matter)
Lepton number conservation 262
Lindhard function 121, 128
Line shape of hadronic atoms 175
Lorentz-Lorenz effect 37, 58, 61, 75, 79, 84, 87, 120, 122, 126, 128, 134, 139, 174
Low energy theorems 30, 73, 105, 106, 111, 242

Magnetic moments 41
A = 3 system 5, 23
heavier nuclei 54
isoscalar component 41, 62
isovector component 42, 62
closed shell $\pm$ one nucleon 42, 50, 56, 58

Magnetic moments
second order configuration mixing 58, 62
effect of the Δ(1236) 63
Migdal quasiparticle interaction 270, 273, 275
Muon capture 131, 173, 175, 247, 253
quenching of g_p 97
in hydrogen 254, 258, 273
at large momentum transfer 179, 192
impulse approximation 269
neutrino polarization 251
neutrino mass 261
exotic reactions 262
effect of SU(4) symmetry 267

Neutrino mass 261
Neutron
thermal radiative capture 5, 23, 105, 109, 141, 162
beta-decay 273
Nolan-Schiffer anomaly 164
Nuclear matter
effect of quenching g_A 35, 121, 123
phase transitions 133, 134, 136
3-body forces 138, 144, 170
4-body forces 138
theory 168
effect of the Δ(1236) 169, 170
Nucleon-nucleon potential
effect of the Δ(1236) 143, 148
omega-meson exchange 161
charge dependence 164
effect of crossed pions 166
Nucleon-nucleon phase shifts
imaginary component 160
effect of two pion exchange 166, 168

OPE contribution
to nucleon-nucleon potential 7
to exchange effects 72, 106, 116, 123
to Δ(1236) transition potentials 145
Overcounting (see Double-counting)

Pair contribution 14, 20, 24, 29, 73, 108, 141, 160, 163
Partially conserved axial vector current (PCAC) 26, 29, 85, 89, 107, 111, 127, 133, 173, 183, 187
Pauli correlations 81, 200
Phase transitions in nuclear matter 133, 134, 136
Photodisintegration of the deuteron 161
Pick-up reactions 228, 233
Pion
capture 173, 175, 267
condensate 2, 120, 130, 132, 133, 134, 139, 185
decay 127
double charge exchange 226, 237, 244
field in nuclei 67, 69, 105, 130, 173
production 147, 155, 157, 168, 233, 243
propagator 127
radiative capture 267
self-energy 127
Pions, somewhat virtual 173
Pionic
atoms 101, 128, 173, 175, 267
current 108, 111, 141, 142
Pion-Deuteron
break-up reactions 227
elastic scattering 226, 227, 234, 237
Pion-nucleon scattering amplitude 73, 85, 99, 143
Pion-nucleus scattering amplitude 99, 120, 122, 127, 174, 185, 215, 225, 243
Pion-pion scattering amplitude 235, 237
Polarizability of nucleon 70
rho-meson effect 86
effect on nucleon-nucleon potential 103, 143
Primakoff theory 180, 259, 264
Proton-nucleus scattering 193, 216
Pseudoscalar current 88, 92, 97, 121, 126, 129, 130, 181, 191, 249, 258, 264

Quadrupole moments 43
Quark model 19, 113, 122, 129, 146, 150, 151, 155, 161, 202

Quenching of g_A 34, 61, 68, 88, 90, 97, 105, 120, 121, 130, 174 190, 192, 271

Recoil effect 20, 29
Renormalization
of strong coupling constant g_r 83
of g_A (see Quenching of g_A)
Rho meson effects 73, 86, 93, 115, 125, 146, 151, 156, 157, 237, 242

Sachs exchange moment 12, 24
Schmidt values 42, 47, 56, 62
Seagull contribution 14, 20, 106, 108
Second-class currents 105, 111, 247, 249, 278
Shadowing effect 234
Short-range correlations 37
Siegert theorem 9, 26
Sigma meson 169
Sigma model 112, 118, 133
Skyrme force 273
Soft-pion theorems (see Low-energy theorems)
Spontaneously broken symmetry 112
Strong coupling models 146, 150, 151, 155
SU(4) symmetry 49, 59, 267

Tensor effects
in beta-decay 33, 41, 58, 123, 124, 262
in magnetic moments 63
in nuclear matter 170
Thermal radiative capture of neutrons (see Neutron, thermal radiative capture)
Three-body forces 138, 144, 170
Time reversal invariance 258
Transition potentials 116, 144, 145
Tree approximation 138
Triton beta-decay 6, 31, 124, 126

Van der Waal's forces 103
Veneziano model 239, 242

Wavefunction renormalization 20, 24, 31
Weinberg model 237, 242
Wigner mode 136
